HARINI K

Software Engineer — Backend Engineering
Chennai, India | 8248365290 | harinikathiravan2002@gmail.com | LinkedIn | Portfolio

PROFESSIONAL SUMMARY

Backend-focused Software Engineer with 2.7+ years of experience designing and shipping scalable services for e-commerce platforms. Skilled in Java 21 and Spring Boot, with production experience across payment integrations, authentication and authorization, marketplace connectivity, REST APIs, database optimization, and Linux-based deployments. Comfortable owning a feature end to end — from API design and third-party integrations through deployment, monitoring, and production support.

WORK EXPERIENCE

CommerceIQ

Application Engineer **Aug 2024 - Aug 2026**

Multi-Channel E-Commerce Platform & Admin Portal

- Developed Java 21 and Spring Boot microservices supporting customer, order, payment, promotion, and marketplace workflows.
- Designed and exposed REST APIs for core e-commerce operations using scalable service-layer architecture.
- Integrated Stripe for payment processing, subscriptions, webhook events, and transaction lifecycle management.
- Implemented JWT, refresh tokens, and Google OAuth2 using Spring Security for secure authentication and authorization.
- Integrated multiple third-party marketplace APIs to synchronize orders and maintain consistent order data across channels.
- Improved API performance by 30% through Redis caching and PostgreSQL query optimization.
- Automated application builds and deployments using Jenkins, Docker, and Linux, reducing manual deployment effort by 40%.
- Used Grafana monitoring and application metrics to identify performance bottlenecks and troubleshoot production incidents.

Zaaroz Services Private Limited **Feb 2024 - May 2024**

Software Engineer Intern

S***ervice Desk Management Platform***

- Developed backend REST APIs for end-to-end ticket lifecycle management, including creation, assignment, escalation, and resolution.
- Implemented role-based access control to manage permissions across different user roles.
- Built real-time communication using WebSockets, Redis, and Pusher for chat and notification workflows.
- Designed database structures and optimized SQL queries for ticket, user, assignment, and communication data.
- Implemented validation and exception-handling mechanisms to improve API reliability and maintain data integrity.
- Developed backend workflows to automate ticket assignment and escalation, reducing manual support operations.

Virtusa Consulting Services Pvt Ltd **Jan 2023 - Apr 2023**

Pega intern Delivery

Product Warranty Claim Management Application

- Contributed to a warranty-claim workflow automation application built on the Pega platform.
- Configured case-management workflows, business rules, and process-automation components.
- Implemented approval routing and SLA-based task management.
- Worked with business and engineering stakeholders to refine requirements and streamline processes.

EDUCATION

Sri Sairam Institute Of Technology **Aug 2019 - Apr 2023**

BE - Electronics And Communication Engineering

TECHNICAL SKILLS

Languages: Java 21 | SQL | JavaScript

Backend: Spring Security | REST APIs | Microservices | JWT Authentication | OAuth 2.0 | API Design

Database & Caching: PostgreSQL | MySQL | Redis

Cloud & DevOps: AWS EC2 | AWS S3 | Jenkins | Linux | CI/CD

Monitoring & Tools: Git | GitHub | Maven | Postman | Swagger | Grafana | IntelliJ IDEA | VS Code

Frameworks & Platforms: Spring Boot | Pega

Other SKills: Object-Oriented Programming (OOP) | System Design | Database Design | Authentication & Authorization | Background Job Processing | Task Scheduling (Cron Jobs) | Agile/Scrum

CERTIFICATIONS

PEGA Certified Senior System Architect | Pega Systems

The Complete JavaScript Course 2023: From Zero to Expert! | Udemy

Red Hat Certified System Administrator | RedHat Linux
